

Load Securing App for SAP EWM

logventus®

Consulting Solution

Managing the Documentation of the Load Securing in warehouses has become a major topic for most companies. If the loading is not secured correctly it can lead to accidents and damages of the products. As a manufacturer this gets very important when it comes to insurance cases. logventus offers a consulting solution that manages the photo documentation of the load securing via smartphone in SAP EWM.

Objective

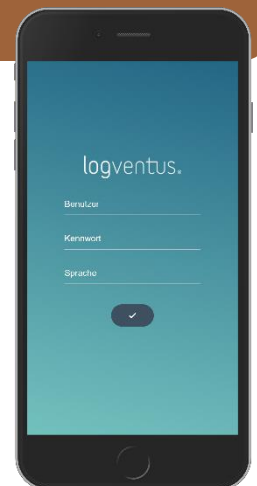

- Enable an easy and safe documentation solution
- Easy archiving process and data management

Implementation

- ITS Mobile or platform-independent app solution with Ionic
- Implementation of a picture upload service in SAP EWM
- Transmission of pictures and metadata from SAP EWM to SAP DMS
- Custom photo handling for an easy picture search

KEY FIGURES

- Platform-independent
- Picture upload service in SAP EWM
- Archiving process in SAP DMS
- Easy to use – works like every other App
- Easy picture search

Benefits

-  Speed up the load securing process
-  Be on the safe side when it comes to an insurance case
-  Solution is expandable
-  Use regular and cheap smartphones
